

Unmatched Scale: How MoveInSync Transformed The Employee Commute Solution for a Fortune Global 500 Consultancy Giant

Commute for 12k+ employees go live in 1 month

Background

A multinational consulting giant needed to streamline their employee commute solution. With 12k+ employees the scale at which they needed to operate was huge. That's where MoveInSync stepped in.....

The MoveInSync Approach

MoveInSync's AI-driven employee commute solution was implemented for the client. The client's internal systems were seamlessly integrated with MoveInSync.

1400 vehicles were onboarded, with a strategic mix of retaining 80% of the existing fleet and 20% new fleet.

Provisions were made for backup vehicles to support during transition.

An ombudsman initiative was launched for drivers, fleet partner owners, and supervisors to provide a confidential and impartial channel for addressing concerns and resolving issues fairly.

What Success Looked Like

The entire solution implementation was completed in a record **one-month time**.

The solution covered over **8 facilities**, with **50,000 + trips** operating within the first month of implementation.

99.5% of OTD (On-Time Departure) was maintained from day 1 of MoveInSync operations.
